### **REASONS FOR ALLOWANCE**

1. Claims 67-95 are allowed in light of the Applicant's argument. The following is a statement of the examiner's reasons for allowance. The present application relates to the field of electrochemical devices which include at least one electrochemically active layer which is capable of reversibly and simultaneously injecting ions and electrons, in particular electrochromic devices. Regarding claim 67, the prior art fails to disclose or fairly suggest a display element having at least one electrochemically active layer capable of reversibly inserting ions, and an electrolyte formed of a layer or a multiplayer stack comprising at least one layer made of an ionically conductive material capable of reversibly inserting the ions but whose overall degree of oxidation is maintained essentially constant. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

2. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
